19.8% HitRate@3

600 synthetic customers

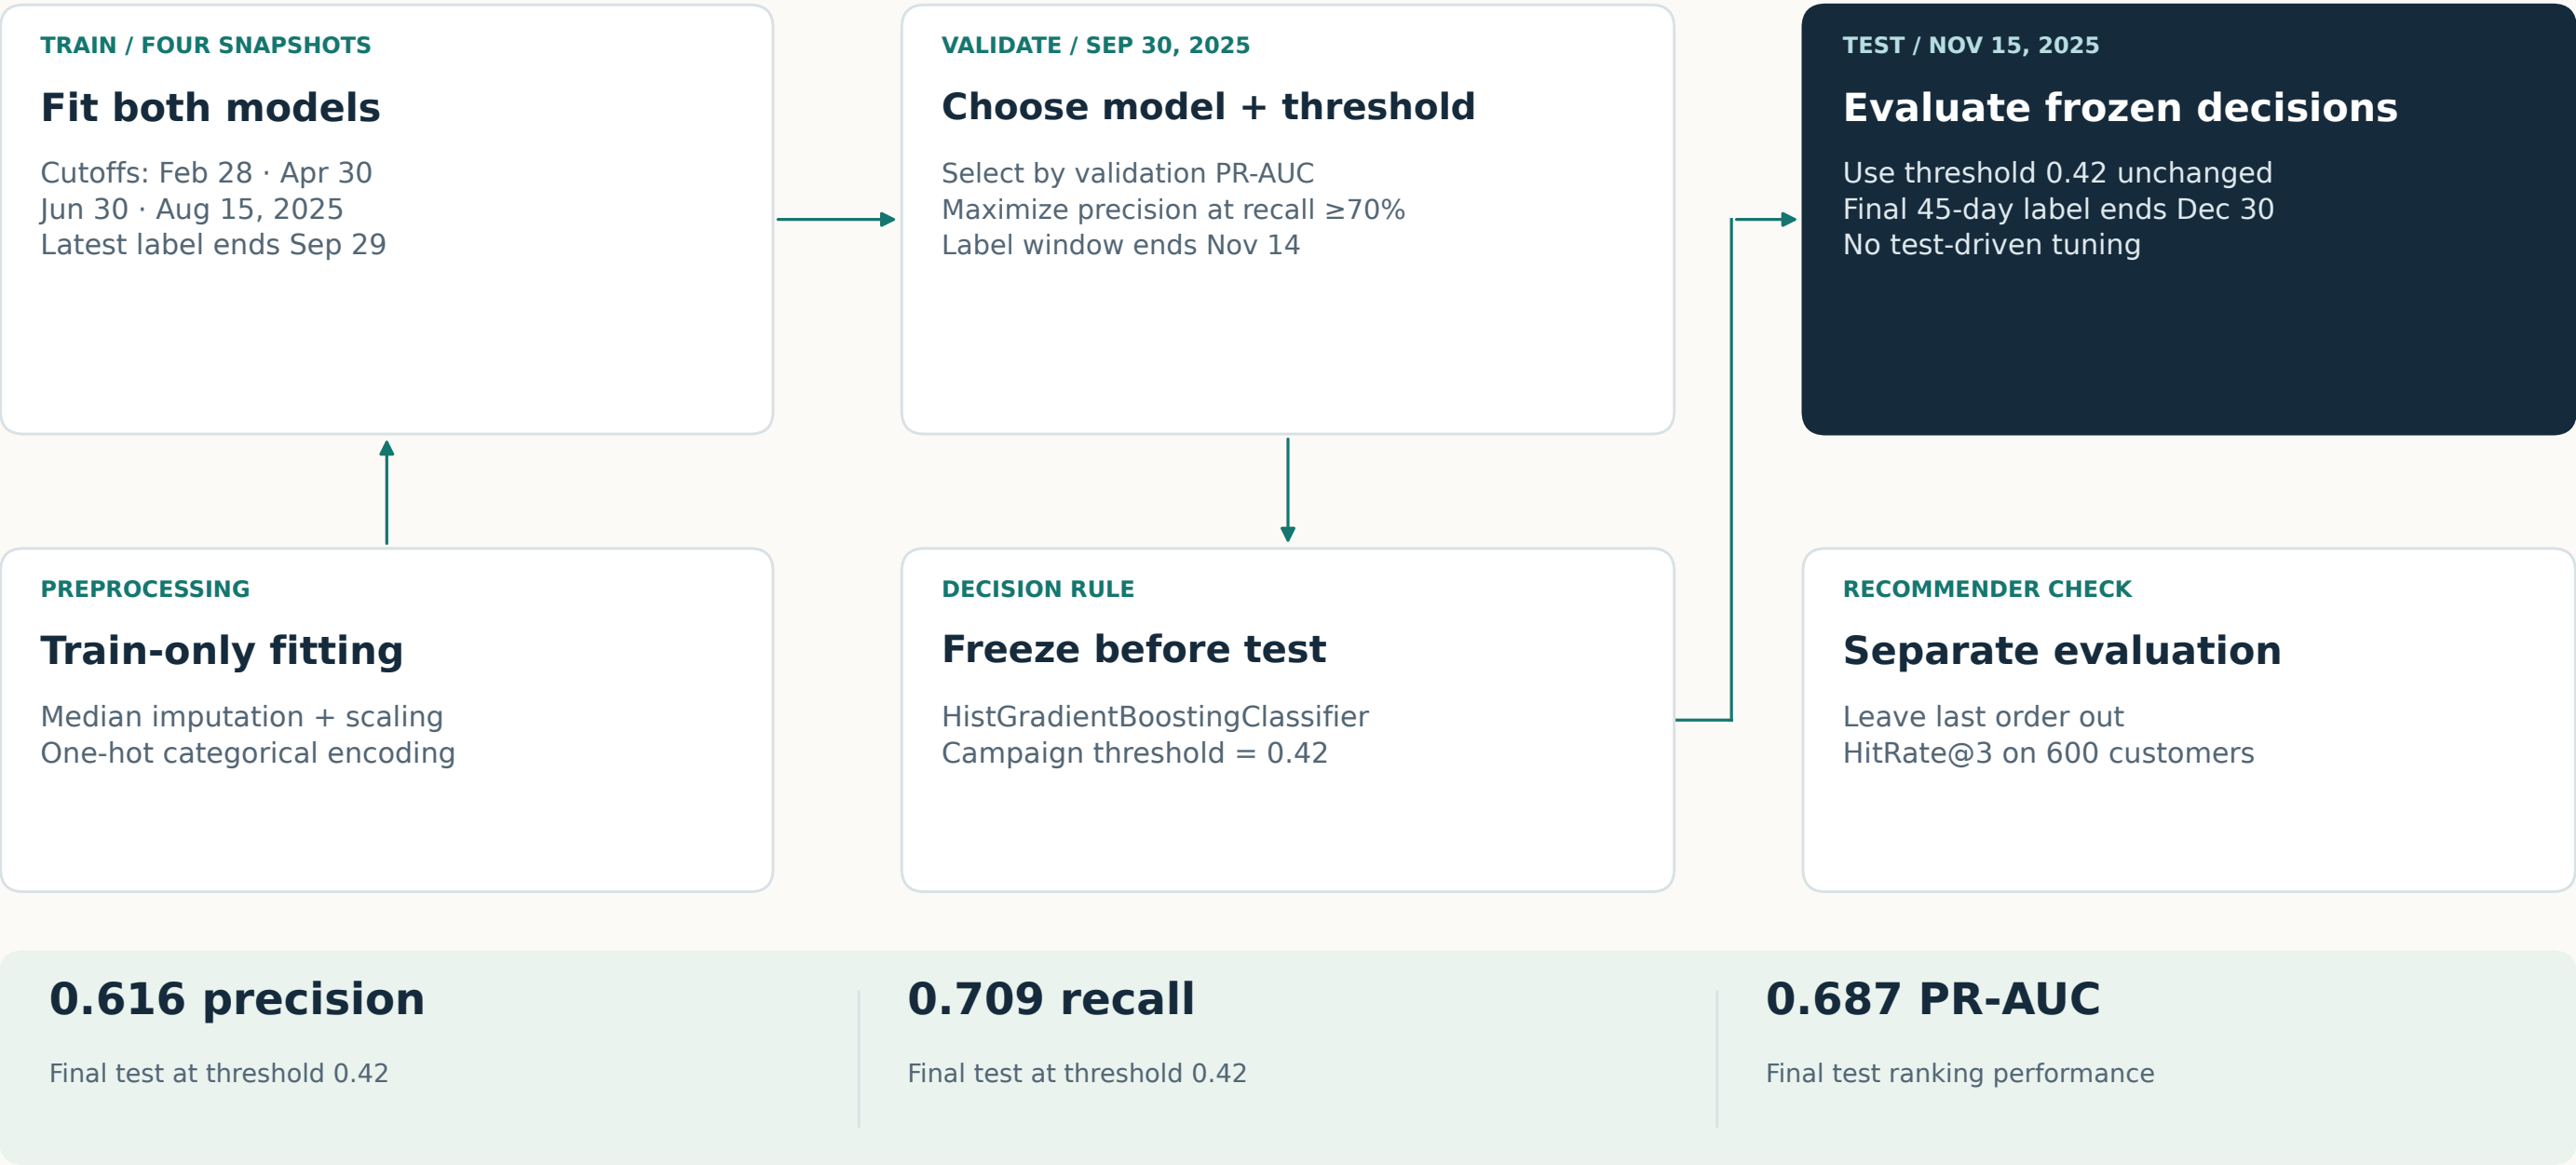

How the repository produces the customer view

Notebook 1 explains behavior. Notebook 2 combines segments, scores and recommendations.

Separate model fitting, decisions and final testing

One row = one customer at a cutoff; only the label looks into the following 45 days.

Source: notebooks/02_repurchase_and_recommendation.ipynb. Repeated customers are allowed across cutoffs.
